Introduction: What is Consciousness?

The nature of human consciousness is the greatest "Hard Problem" or "The Binding Problem" facing by science and mankind from many centuries and is being approached by many disciplines including neuroscience, cognitive science, computer science, physics, mathematics, medicine, philosophy and religion. Some of main **Consciousness theories are as below:**

1. Artificial Intelligence and Singularity:

The AI Scientists consider consciousness as simply the sum total of brain activities and it is proposed that Consciousness emerges from the material stuff of the brain (i.e. conscious machine). Al Singularity can create the best "Work Intelligence" machine but cannot create an "Emotional Intelligence" machine.

Consciousness can create mathematics, but no Mathematics can create the Consciousness.

As per Neuroscience, Consciousness is a manifestation of emergent firing patterns of neuronal groups involved in either specific networks coherent 40-80Hz firing and/or attentional scanning circuits. But even precise correlation of neuronal firing patterns with cognitive activities fails to address perplexing differences between mind and brain including the "hard problem" of the nature of our inner experience

3. Quantum Brain Theory:

Most accepted Quantum Brain theory is **Orchestrated Objective Reduction (Orch-OR)** Theory of Dr. Stuart Hameroff and Dr. Roger Penrose, which says that Consciousness is a result of quantum gravity acting on the microtubules of neurons of the brain [1]. Consciousness is non local; it does not exist exclusively in the brain. Here it is introduced idea that consciousness is a basic frequency of quantum space [2].

There are many unanswered questions about consciousness e.g. –

- (1) What is the source of various frequencies/vibrations in the brain?
- (2) Who is the observer in brain (homunculus issue)?
- (3) How do the quantum wave functions collapse?
- (4) Does consciousness exist independently of body?
- (5) What is origin of experience? etc.

We will get answers of all above questions by Consciousness Quantum Spiritual Energy (CQSE) Theory :

Revealing the Real Science of Consciousness through a Novel Divine Sacred Geometrical Structure of Conscious Quanta

Author: Hemant Bhoir B.Com

4.CQSE-Consciousness Quantum Spiritual Energy (Conscious Observer) Theory:

CQSE. In scientific experiment consciousness acts as an observer. CQSE is itself consciousness creator and operates human body through its control circuit via brain and power circuit via subtle light body. In reality CQSE is very subtle spiritual energy, whose basic frequencies acts on brain by creating vibrations through Aether (quantum vacuum energy) medium, which creates electromagnetic biophotons [3] through torsion waves and these acts on microtubules of brain as per quantum computing [1], which gives signals to nucleus or transmission of vibrations under mechanism of unified sacred geometric field for collapse of quantum wave functions which gives experience to CQSE. This unified sacred geometric field produced from 16 Aether energy points of CQSE and drives body through brain's relay command center along with 7 main and 6 minor chakras of subtle light body.

So our Body is like a Robot, Brain is like Super Processor and CQSE is like a **Programmer.** The location of CQSE in Brain is between Hypothalamus and Pituitary Gland as shown in figure.

The subtle Planck geometry of CQSE is very small and less than 1.616 X10⁻⁵ meter. There are 16 Aether energy points in CQSE, in which 3 points act as operating system (Mind, Intellect and Impression) and 13 points includes nature's 5 elements, values and powers of CQSE with angles of 18, 36, 72, 108 degrees, which are connected to 13 chakras of subtle light body and these energy chakras are connected to different parts of physical body. CQSE creates Aether energy at Planck scale by creating frequencies and vibrations in Hilbert Space, with the help of 10 dimensional Meta-Strings of 16 Aethric energy points, which are connected to each others. This mechanism can be explore with the help of Meta-String Theory and Aether Quantum Dynamic Physics. This proposed geometry of CQSE is nothing but 'Quantum' Platonic World of Wisdom and Light' which is represented by Pentagonal Star'.

Mathematics of CQSE :

CQSE Substructure consists of N=16 meta-points, (subparticles), all of which are connected to each other by N(N-1)/2= 120 meta-strings. Their wave function expressed as:

Equation (1) is that of the bodyless CQSE. In the embodied state, they are coupled with body. The wave function of the embodied state can be written as -

Now the wave function of human body can be written as the tensor product is the wave function of the embodied state can be written as -

To understand the secret of consciousness, we must Know, who we are? Are we this physical body? In reality we are not this mortal physical body but a point of metaphysical light energy i.e Consciousness Quantum Spiritual Energy (CQSE), which is very subtle & immortal. In this theory, we introduce the idea that consciousness is a basic frequency of CQSE in quantum space. Human brain has ability to "connect" and harmonize with

The Cortex of the brain conducts a Fourier transformation [4] on the inputs received form sensory organs of human body and distributes the constituent frequencies all over the neurons in the brain via hypothalamus and pituitary region, which collapses the wave function with CQSE and it gets experience. Every nucleus of neurons has program like other cells (like WBC, RBC) to pass the signals or received the signals as per their group programming of brain regions. They have only memory of processing patterns of vibrational signals as CPU have instruction codes. All memory of life is only in the CQSE (Programmer). The brain is simply a Processor to get the instruction from the CQSE. When a CQSE participates in a meta-Bose-Einstein Condensation the number of available bits becomes

In this stage therefore, the information storage capacity is infinite. There is also the possibility of information storage on strings via the standing waves.

haracteristics of CQSE :

- sciousness Creator
- ernality and Immortality
- servation and Visualization
- nity and Uniqueness
- elligence, Thinking and Decision Making
- ontrollability and Powering
- werfulness of Minds
- cred Geometry and Unified Field
- ncoding and Decoding
- instein-Boson Condensation State &
- ternal and Temporary Nature
- teracting and Connecting
- nergy Utilization
- velling Speed

There are three ways in which CQSE performs the work at Mind, Voice and Physical Level.

1. Mind - At mind level it produces thoughts through energy points 16, 14, 16, 15, 16 of control circuit.

2. Voice- It produces voice through energy points 16, 14, 16, 15, 16 of control circuit and 10, 11, 12 of power circuit.

3. Physical Work- It performs the physical work through energy points 16, 14, 16, 15, 16 of control circuit and 12, 11, 1, 2, 10 of power circuit. Also the CQSE can perform multiple works on thought, voice and physical levels simultaneously.

Control & Power Circuit of CQSE

Control Circuit: Human consciousness produced from operating system of mind, intellect and explore all secretes of Human consciousness with physical universe, which will help mankind to get peace, impressions of the CQSE in which intellect is at the center and it acts as a signal receiver and happiness and good health forever. transmitter. According to intellect recorded parts, Mind generates thought signals which will be Conclusions given to intellect for final decision and accordingly intellect produces a basic vibrational frequency which will be decoded by the particular group of neurons present in the hypothalamus CQSE is the consciousness creator. There are only two types of consciousness-& pituitary, this will produce electromagnetic & electrochemical signals respectively. EM signals (1) Eternal Consciousness i.e. Soul consciousness (2) Temporary consciousness i.e. send to cerebellum via Pineal gland & different lobes and EC signals send to cerebellum directly. Body Consciousness. The aura results validate the eternal consciousness of CQSE. Then EM & EC signals send to respective organ system via subtle light body to carry out particular act by the body. In this way control signal is initiated to carry out a particular act by the

Power Circuit: Power for movement of body parts will be provided by a particular chakra of subtle light body which is continuously created by CQSE. Mind creates feelings after completion of a particular act, after sometimes repetition it became the habit and get stored in impression point. In this way, CQSE drives physical body on energy, frequency and vibration level.

If we remove "Transistor" from radio circuits and asked any Electronic experts to explain how radio circuit works? Then no one can give perfect answer for the working of radio circuit and it will become mystery forever. In same way, we are not considering the CQSE (Conscious Quanta) in Human **Consciousness that's why** Consciousness became mystery for mankind, but if we do research with CQSE theory then we will get all answers of Human Consciousness.

Cognition process of CQSE:

- A Intellect gives input signal to Mind as per
- recorded in it B - Mind creates thought signal and return to
- **C** Intellect check the thought as per Impression records.
- **D** Impression with available past records data in it gives signal to intellect. **E** - Intellect gives final signal for execution of

Method to Charge CQSE with SCQSE

Presently all human beings considering themselves as physical body that's why they are in body consciousness which is the main reason for all sorrows of the world. If we realize our real identity as CQSE (Soul Consciousness) then we can liberate ourselves from all worldly sorrows. When we (CQSE) connect our intellect with SCQSE (Supreme CQSE) i.e. Supreme Universal Consciousness then all energy points of CQSE gets charged and we achieve the stage of Higher & Holy Consciousness.

 $\mathbf{V}^{Meditation} = \mathbf{V}^{SCQSE} \mathbf{\ddot{A}} \mathbf{V}^{CQSE}$

Equation (4)

Results of CQSE in Aura Scanning

We have done experiment of this Ancient Rajyog Meditation by charging energy points of CQSE with Supreme CQSE then we got Super active Higher Consciousness Aura as per result given by Aura Scanning Machine. The results are shown in following images.

We can solve many questions of Psychic phenomenon, such as telepathy, precognition, extra sensory perception (ESP), out of body experiences (OBE), lucid dreaming and near death experiences (NDE), Who is sleeping? Past Life Regression, Life after death, DNA, RNA & GEMONE Issues, How is Information Coded in Neural Activity? How are Memories Stored and Retrieved? How is Time Represented in the Brain? What is disease? etc can be explain through this CQSE Theory of Consciousness.

Our further deep research is going on for revealing the CQSE details working Sacred Geometrical mechanism with Human Brain under Meta-String theory and Aether Quantum Dynamic Physics. This will

CQSE drives the human body with Aether energy through control system via brain and power system via subtle light body.

CQSE gives program to DNA via morphogenetic field according to past birth to build organs of body and also it carries information for next birth of Human Body.

CQSE model of human consciousness has potential to answer many questions related to human consciousness.

The essential; thesis is "We are CQSE" and not this physical body. We can shift our consciousness from lower to highest level by establishing a bound state with Supreme CQSE(i.e. Unified field of the universal).

As human identity arises from consciousness - the reallization of self as CQSE, will induce universal brotherhood and social uniformity. Propagation of these changes into nature would lead to harmonious state which may be called the GOLDEN AGE **UNIVERSE.**
